Summary

Software Engineer with 4+ years of experience building **scalable backend systems, microservices, and cloud-native applications** using **Python, Java, FastAPI, Spring Boot, and Node.js**. Strong expertise in **distributed systems, REST/gRPC APIs, event-driven architectures**, and enterprise applications deployed on **AWS and Kubernetes**. Experienced in designing high-performance systems with **Docker, Kafka, Redis, CI/CD pipelines**, and database optimization. Proven ability to improve application scalability, reliability, and performance through modern engineering practices. Passionate about **backend engineering, cloud computing**, and building resilient distributed platforms for enterprise-scale applications.

Skills

Programming Languages: Python, Java, C++, C#, SQL, JavaScript, TypeScript

Backend Development & Frameworks: FastAPI, Spring Boot, Django, Node.js, Express.js, .NET Core, REST APIs, gRPC, Microservices Architecture, System Design

Frontend Technologies: React.js, Next.js, HTML5, CSS3

Cloud & Distributed Systems: AWS (Lambda, EC2, S3, SNS, SES, EKS), Azure (Functions, AKS, Blob Storage, Service Bus), Distributed Systems, Event-Driven Architecture

DevOps & CI/CD: Docker, Kubernetes, Jenkins, GitHub Actions, Azure DevOps, CI/CD Pipelines, Linux, Bash

Databases & Caching: MySQL, PostgreSQL, MongoDB, DynamoDB, Redis

Data Streaming & Big Data: Apache Kafka, Apache Spark, Hadoop

Machine Learning & AI: TensorFlow, PyTorch, Scikit-learn, NLP, Computer Vision, MLflow

Security & Authentication: OAuth2, JWT, RBAC, TLS, AES Encryption

Monitoring & Observability: Prometheus, Grafana, ELK Stack, CloudWatch, Logging & Metrics

Tools & Version Control: Git, GitHub, Maven, Gradle, Postman, VS Code, IntelliJ IDEA

Work Experience

ServiceNow, USA

Nov 2024 – Present

Software Engineer

- Designed and built backend services using Python with FastAPI and Flask, delivering 9 microservices to support data ingestion, transformation, and core business logic across internal workflows.
- Managed transactional data in SQL Server, writing optimized queries and stored procedures to support high-volume operations and reporting needs.
- Developed a GraphQL aggregation layer that unified data from SQL Server and DynamoDB, enabling frontend clients to retrieve combined datasets in a single request and improving response times significantly.
- Integrated services with AWS, using SQS for message queuing between distributed components & S3 for secure file storage and backup. Deployed AWS Lambda to automate data validation & cleansing tasks, processing average of 400 records per day.
- Wrote unit and integration tests using Python's unittest framework, achieving over 90% test coverage. Used mocking and stubs to isolate service dependencies and support test-driven development.
- Containerized all services with Docker to maintain consistent runtime environments across development, staging, and production. Set up CI/CD pipelines using Jenkins to automate builds, tests, and deployments, reducing release cycle time.
- Built internal automation scripts and CLI tools in Python to handle routine database maintenance and deployment checks, saving the team approximately 4 hours of manual effort per week.

Disha Enterprise, India

January 2021 - July 2023

Software Engineer

- Developed a cloud-based log analytics platform using C#/.NET Core and C++, processing over 1M+ log events daily with optimized backend performance.
- Engineered scalable backend services using Spring Boot and .NET Core integrated with MySQL and MongoDB for high-volume enterprise applications.
- Built real-time streaming pipelines using Apache Kafka, increasing system throughput by 30% and improving data processing efficiency.
- Developed responsive frontend components using React and TypeScript, improving application usability and user engagement by 20%.
- Optimized PostgreSQL and DynamoDB database queries, reducing execution time by 35% and improving application responsiveness.
- Designed multithreaded C++ modules for high-speed log parsing and caching, enhancing processing efficiency for large-scale datasets.

Education

Master of Science in Information Technology | Arizona State University, USA • Graduated May 2025 | **GPA: 4.0/4.0**

Bachelor of Engineering in Computer Science | Indus University, India • Graduated May 2023 | **GPA: 3.96/4.0**

Certification

[Microsoft Azure AI Essentials Professional](#)

[Level up LLM applications development with LangChain and OpenAI](#)
