SUMMARY

Product Manager with 4+ years shipping enterprise SaaS and AI-powered products end-to-end - from discovery and PRD through deployed code. Hands-on builder with production LLM experience (Claude API, RAG, WebRTC) and cross-functional ownership across 0→1 and scaled platforms. Proven track record driving measurable adoption, retention, and cost outcomes at both startup and enterprise scale.

SKILLS

AI & Machine Learning: LLM Integration (Claude API, OpenAI), RAG Pipelines, Agentic AI Workflows, Prompt Engineering, AI Governance & Responsible AI, LLM Evaluation

Product Management: Product Strategy, Product Vision, Roadmap Planning, PRDs, User Stories, Backlog Management, Sprint Planning, Feature Prioritization, Go-to-Market, A/B Testing, Competitive Analysis, Market Research, OKRs, Agile / Scrum / SAFe, Stakeholder Management, User Research, Usability Testing & UAT, Cross-functional Leadership

Data & Analytics: SQL, Power BI, Tableau, Mixpanel, Google Analytics

Building & Tooling: React (Vite), Node.js, Python, REST APIs, AWS (EC2, RDS, S3), Figma, Jira, Confluence, CI/CD, Postman

EXPERIENCE

ServiceNow

Nov 2024 – Present

Product Manager · Enterprise AI platform · Now Assist, AI Control Tower, Agent Studio

- Scaled AI agent adoption org-wide: led enterprise rollout of 60+ Now Assist agents across ITSM, HRSD, and CRM moving 40-person pilot to 600+ active users in 10 weeks, achieving 38% ticket deflection and \$2.1M in cost avoidance.
- Defined and drove AI Control Tower framework adoption across 14 business teams, enabling agentic AI deployment with full RBAC, compliance, and auditability, compressing governance review cycles from 3 weeks to 4 days.
- Deployed change management and SecOps AI agents via Agent Studio, automating repetitive incident workflows and driving a 42% reduction in mean time to resolution (MTTR) across 3 business units — freeing agents from manual triage to focus on complex escalations.
- Improved AI output quality at scale: partnered with platform and data teams to remediate 10,000+ CSDM and knowledge base records as AI readiness prerequisites, reducing LLM hallucination risk and improving Now Assist response accuracy by 22%.
- Established data quality standards and alignment protocols across platform, security, and content teams — resolving cross-functional blockers and enabling 3 previously stalled AI feature launches to ship on schedule.

Infinite Infolab

Jan 2021 – Jul 2023

Product Manager · B2B Field Service Management SaaS · OmniServe platform · Sole PM, 0→1 ownership

- Owned full OmniServe roadmap across 18 sprints - introduced early risk flagging that achieved 98% sprint commitment, cut cross-team disruptions by 60%, and directly unlocked onboarding of 5 enterprise clients in Q4.
- Led research-driven UX redesign: ran 4 usability testing cycles (20+ users) in Figma, increased task completion rate 28%, and cut new-user onboarding time from 3 days to under 8 hours.
- Turned data into retention: built Mixpanel + Google Analytics framework, identified SLA visibility gaps, and launched automated alerts - reducing resolution time 40% and preventing churn of 3 enterprise clients worth ~\$180K ARR.
- Shipped API-driven feature 2 weeks early: defined API contracts and aligned Node.js and Flutter teams via Postman for real-time field agent tracking - early delivery contributed directly to a \$33K contract renewal.
- Led zero-downtime AWS migration: directed on-prem to AWS (EC2, RDS, S3) migration in 6 weeks; reduced downtime 90%, raised CSAT from 3.6 to 4.4/5, and supported 5 enterprise client onboardings in one quarter.

EDUCATION

Master of Science in Information Technology | Arizona State University, USA • Graduated May 2025 | GPA: 4.0/4.0

Bachelor of Engineering in Computer Science | Indus University, India • Graduated May 2023 | GPA: 3.96/4.0

CERTIFICATION

- Microsoft Azure AI Essentials Professional
- Level up LLM applications development with LangChain and OpenAI
